

NRO REVIEW COMPLETED

TOP SECRET

STAFF MEETING MINUTES - 22 July 1958 CORONA ITEMS

Personnel Present: Mr. Bissell
Col. Burke

Mr. Cunningham Col. Geary

1. Progress on CORONA, [redacted] and GUSTO. Mr. Bissell reported that in general the recent trip of several staff members to the West Coast indicated that CORONA, [redacted] and GUSTO all were proceeding satisfactorily. The delays normally anticipated at this developmental stage of these projects so far had not turned up.

2. GUSTO. Mr. Bissell requested [redacted] to review the latest OSI report on Russian ground-to-air missile capability. He felt it possible that this prediction on the Russian 1961 kill-probability might be overstated, but that such an estimate was crucial to proceeding with GUSTO. Also to be examined, but of lesser priority, is the Russian air-to-air missile capability.

ACTION: [redacted] - SUSPENSE: 30 July (in time for 31 July panel session)

3. CORONA. In response to a query Mr. Bissell stated that not more than one person from the DPS staff would need to be primarily involved in the field on CORONA.

Mr. Bissell said a meeting was needed in the near future among Col. Sheppard, [redacted] to discuss (a) cover and (b) operational procedures on CORONA. Mr. Bissell also commented that someone from Operations should make an on-the-spot examination of the physical layout at Cooke.

ACTION: Operations.

APPROVED:

WILLIAM BURKE
Colonel, USAF
Deputy Director, DPS/DCI
